Mbiufun Platform Enhancements — Lumpsum Quote

Developer: Cyprian Kibet Koech
Client: Mbiufun Ltd.
Client Representative: Dr. Edwin Adoyo Obie
Date: _____
Quote Reference: MBIU-QT-____/2025

1. Introduction

This document outlines the fixed-price quotation for a set of enhancements to the Mbiufun platform. The goal of this phase is to unify the user experience, improve the posting workflow, and introduce advanced visibility and tagging features. All work includes both **Frontend (Angular)** and **Backend (Django)** development.

2. Scope of Work

Feature 1 — Merge Activities and Vibes

Combine the current *Activities* and *Vibes* sections into a single, unified feed:

- Consolidated navigation
 - Unified UI components
 - Shared backend endpoints
 - Streamlined posting and viewing experience
-

Feature 2 — Location + Up to 3 Photos for Activity Posts

Upgrade the activity creation system to support:

- Mandatory **location** field
 - Optional **1-3 photos** per activity post
 - UI expansion (currently only supports 1 photo)
 - Backend support for multiple photos
-

Feature 3 — Snapchat-Style Visibility Filter

Introduce a custom visibility system for posts, enabling users to select:

- Everyone
- Friends only
- Only me
- Specific individuals
- Custom groups

This gives users finer control over who sees their content.

Feature 4 — Custom Group Creation

Enable users to create their own visibility groups, including:

- Naming the group
- Adding/removing members
- Saving the group for future visibility use

These groups integrate directly with the visibility selector.

Feature 5 — Tagging + Notification System

Add a tagging feature to activity posts:

- Tag individual users during creation
 - Notify tagged users instantly
 - Show tagged individuals inside the post details
-

3. Deliverables

- Fully merged Activities/Vibes feed
 - Updated activity creation with location and 1–3 photos
 - Visibility filter integrated into posting workflow
 - Custom group management system
 - Tagging and notification mechanism
 - Updated frontend & backend logic
 - Fully tested, functional build
-

4. Total Lumpsum Cost

KES 30,000 (Thirty Thousand Kenya Shillings)

This cost covers the entire scope of work above, with no hidden or hourly charges.

5. Payment Terms

- **50% Deposit:** KES 15,000 — payable before work begins
 - **50% Balance:** KES 15,000 — payable upon delivery and approval
-

6. Development Timeline

Based on a 3-hour/day development pace:

Estimated completion time: 4–5 weeks

7. Acceptance

To proceed, Mbiufun Ltd. must confirm acceptance of this quote and settle the 50% initial deposit.
